

Smart POS - Networked Multi-User System

A complete Point of Sale system with real-time Firebase sync, inventory alerts, eTIMS tax integration, multi-role access, credit sales, and comprehensive reporting.

Deploy to Render

Method 1: Deploy via GitHub (Recommended)

1. Push this code to a GitHub repository

```
git init
git add .
git commit -m "Initial POS deployment"
git branch -M main
git remote add origin https://github.com/YOUR_USERNAME/smart-pos.git
git push -u origin main
```

2. Go to [Render Dashboard](#)

3. Click “New +” → “Web Service”

4. Connect your GitHub repository (smart-pos)

5. Configure the service:

- **Name:** smart-pos (or your preferred name)
- **Environment:** Node
- **Build Command:** npm install
- **Start Command:** npm start
- **Plan:** Free

6. Click “Create Web Service”

7. Wait for deployment (~2-3 minutes)

8. Your app will be live at: <https://smart-pos-XXXX.onrender.com>

Method 2: Deploy via Render Blueprint

1. Create a render.yaml file in your repo root:

```
services:
- type: web
  name: smart-pos
  runtime: node
  plan: free
  buildCommand: npm install
  startCommand: npm start
  envVars:
    - key: NODE_VERSION
      value: 18
```

2. Push to GitHub and use Render’s “Blueprint” option to deploy.

🔥 Firebase Setup (One-Time)

Before using the app, enable these in your Firebase Console:

1. Firestore Database

- Go to [Firebase Console](#) → smart-pos-d409e
- **Firestore Database** → **Create database**
- Choose **Start in test mode**
- Select region: europe-west or closest to your location

2. Authentication (Anonymous)

- **Authentication** → **Get started**
- **Sign-in method** tab
- Enable **Anonymous** → **Save**

3. Firestore Rules (Production)

After testing, secure your database:

```
rules_version = '2';
service cloud.firestore {
  match /databases/{database}/documents {
    match /stores/{storeId}/{document=**} {
      allow read, write: if request.auth != null;
    }
  }
}
```

👤 First-Time Setup

1. Open your deployed URL
2. The app auto-connects to Firebase
3. Create your **first Admin account**
4. Demo data auto-seeds (4 staff, 3 customers, 8 products)
5. Start using immediately!

📝 Demo Logins (PIN: 1234)

Staff ID	Role	Access
ADMIN001	Admin	Full system
MGR001	Manager	All except admin-only
SUP001	Supervisor	POS, reports, products, customers
CSH001	Cashier	POS only

Features

-  **Real-time sync** across all devices via Firebase
-  **Offline mode** - works without internet, syncs when back
-  **Inventory alerts** - low stock & critical stock warnings
-  **eTIMS integration** - KRA tax invoice generation
-  **Multi-role system** - Admin, Manager, Supervisor, Cashier
-  **Credit sales** - customer credit tracking & payments
-  **Shift logs** - automatic sign-in/out tracking
-  **Expense management** - rent, salaries, utilities, etc.
-  **Profit & Loss reports** - daily, weekly, monthly
-  **CSV export** - download any report
-  **Barcode scanning** - instant product lookup
-  **Purchase stock** - supplier purchase tracking

Environment Variables (Optional)

You can set these in Render dashboard → Environment:

Variable	Description
FIREBASE_API_KEY	Your Firebase API key
FIREBASE_AUTH_DOMAIN	Auth domain
FIREBASE_PROJECT_ID	Project ID
FIREBASE_STORAGE_BUCKET	Storage bucket
FIREBASE_MESSAGING_SENDER_ID	Sender ID
FIREBASE_APP_ID	App ID
FIREBASE_MEASUREMENT_ID	Analytics ID
